Revenue from Contract
with Customer
[Abstract]

Revenue

The Company recognizes revenue at the amount to which it expects to be entitled when control of the products or services is transferred to its customers. Control is generally transferred when the Company has a present right to payment and title and the significant risks and rewards of ownership of products or services are transferred to its customers. For most of the Company's Products net sales, control transfers when products are shipped. For the Company's Services net sales, control transfers over time as services are delivered. Payment for Products and Services net sales is collected within a short period following transfer of control or commencement of delivery of services, as applicable.

The Company records reductions to Products net sales related to future product returns, price protection and other customer incentive programs based on the Company's expectations and historical experience.

For arrangements with multiple performance obligations, which represent promises within an arrangement that are distinct, the Company allocates revenue to all distinct performance obligations based on their relative stand-alone selling prices ("SSPs"). When available, the Company uses observable prices to determine SSPs. When observable prices are not available, SSPs are established that reflect the Company's best estimates of what the selling prices of the performance obligations would be if they were sold regularly on a stand-alone basis. The Company's process for estimating SSPs without observable prices considers multiple factors that may vary depending upon the unique facts and circumstances related to each performance obligation including, where applicable, prices charged by the Company for similar offerings, market trends in the pricing for similar offerings, product-specific business objectives and the estimated cost to provide the performance obligation.

The Company has identified the performance obligations regularly included in arrangements involving the sale of iPhone, Mac and iPad. The first material performance obligation, which represents the substantial portion of the allocated sales price, is the hardware and bundled software delivered at the time of sale. The second material performance obligation is the right to receive certain product-related bundled services, which include iCloud®, Siri® and Maps. The Company allocates revenue and any related discounts to all of its performance obligations based on their relative SSPs. Because the Company lacks observable prices for product-related bundled services, the allocation of revenue is based on the Company's estimated SSPs. Revenue allocated to the delivered hardware and bundled software is recognized when control has transferred to the customer, which generally occurs when the product is shipped. Revenue allocated to product-related bundled services is deferred and recognized on a straight-line basis over the estimated period they are expected to be provided.

Revenue

For certain long-term service arrangements, the Company has performance obligations for services it has not yet delivered. For these arrangements, the Company does not have a right to bill for the undelivered services. The Company has determined that any unbilled consideration relates entirely to the value of the undelivered services. Accordingly, the Company has not recognized revenue, and does not disclose amounts, related to these undelivered services.

For the sale of third-party products where the Company obtains control of the product before transferring it to the customer, the Company recognizes revenue based on the gross amount billed to customers. The Company considers multiple factors when determining whether it obtains control of third-party products, including evaluating if it can establish the price of the product, retains inventory risk for tangible products or has the responsibility for ensuring acceptability of the product. For third-party applications sold through the App Store, the Company does not obtain control of the product before transferring it to the customer. Therefore, the Company accounts for all third-party application-related sales on a net basis by recognizing in Services net sales only the commission it retains.

Net sales disaggregated by significant products and services for 2024, 2023 and 2022 were as follows (in millions):

	2024	2023	2022
iPhone	\$201,183	\$200,583	\$205,489
Mac	29,984	29,357	40,177
iPad	26,694	28,300	29,292
Wearables, Home and Accessories	37,005	39,845	41,241
Services ⁽¹⁾	96,169	85,200	78,129
Total net sales	<u>\$391,035</u>	<u>\$383,285</u>	<u>\$394,328</u>

(1) Services net sales include amortization of the deferred value of services bundled in the sales price of certain products.

Total net sales include \$7.7 billion of revenue recognized in 2024 that was included in deferred revenue as of September 30, 2023, \$8.2 billion of revenue recognized in 2023 that was included in deferred revenue as of September 24, 2022, and \$7.5 billion of revenue recognized in 2022 that was included in deferred revenue as of September 25, 2021.

The Company's proportion of net sales by disaggregated revenue source was generally consistent for each reportable segment in Note 13, "Segment Information and Geographic Data" for 2024, 2023 and 2022, except in Greater China, where iPhone revenue represented a moderately higher proportion of net sales.

As of September 28, 2024 and September 30, 2023, the Company had total deferred revenue of \$12.8 billion and \$12.1 billion, respectively. As of September 28, 2024, the Company expects 64% of total deferred revenue to be realized in less than a year, 25% within one-to-two years, 9% within two-to-three years and 2% in greater than three years.
